

Conference-at-a-Glance

Tuesday, June 9	Pre-Conference Short Courses*						
Wednesday, June 10	Novel Preclinical Models in Oncology	Translational Imaging in Cancer Drug Development	Targeting GPCRs	New Models for Predicting Drug Toxicity	Blood-Brain Barrier	Mastering Medicinal Chemistry	Chemical Biology for Target Validation
	Plenary Keynote Panel						
Thursday, June 11	Novel Preclinical Models in Oncology	Translational Imaging in Cancer Drug Development	Targeting GPCRs	New Models for Predicting Drug Toxicity	Blood-Brain Barrier	Mastering Medicinal Chemistry	Chemical Biology for Target Validation
	Tumor Models for Cancer Immunotherapy	3D Cellular Models	Targeting Histone Acetylation	Synergistic Use of Functional Genomics Technologies	Applying Pharmacology to New Drug Discovery Training Seminar*	Property-Based Drug Design in Medicinal Chemistry	Chemical Proteomics for Target Validation
Dinner Short Courses*							
Friday, June 12	Tumor Models for Cancer Immunotherapy	3D Cellular Models	Targeting Histone Acetylation	Synergistic Use of Functional Genomics Technologies	Applying Pharmacology to New Drug Discovery Training Seminar*	Property-Based Drug Design in Medicinal Chemistry	Chemical Proteomics for Target Validation

* Separate registration required.
